Please ask us before getting started.

Lot Coverage

In order to protect the character of properties and insure the orderly development thereof, the City regulates land usage. In addition to the above conditions, the total lot coverage of all the structures located on the property must not exceed 35%.

The accessory structures shall not occupy more than 30% of the required rear yard setback. The rear yard setback in an R1 zone is the last 25' and in a R2/R3 zone is the last 10'. In order to calculate your lot coverage, take the length of the lot and multiply the setback depth to equal your square footage. Subtract your proposed accessory structure and all existing structures that are over 30" tall (anything over 30" is considered a structure). *Example on back.*

Ask Us

Please keep in mind that Auburn is unique. The size and placement of your home plays a roll in adding any accessory structures. Contact the City prior to starting your project.
