Residential solar and battery storage permits. Instantly.

Streamlined residential solar permits are now available in Auburn. Symbium's online, automated permitting platform automatically checks for code compliance and facilitates the issuance of permits in real time for residential rooftop solar and battery storage systems.

To get started:

- 1 Go to Symbium.com.
- 2 Enter the property address.
Symbium provides rich data about the property and its permit history.
- 3 Click on the Instant Permitting tab.
When you're ready to get an instant solar permit, navigate to the *Instant Permitting* tab and click on the *Rooftop Solar or Battery Storage Installation* button.
- 4 Download your approval document.
Answer questions about the scope of work. If your project is code compliant, you can download your approval document.
- 5 Apply for a permit.
Upload your approval document to your online permit application.

See Symbium in action!
