

Armed Forces Medallions

Armed Forces Medallions

This tile honors the six branches of the United States Armed Forces. It honors all past service members and the 1.3 million service members serving today that protect and serve our nation.

The Army is the oldest branch and provides ground forces. The Navy protects the country on, above and below the water. The Marine Corps is technically a branch of the Navy but is seen as a separate unit, they are often the first responders. The Coast Guard protects our coastline and maintains the law and maritime safety. The Air Force defends our skies. The newest branch, the Space Force, protects United States and our allies interests in space.
